Drawings

Page 2

1. The drawings are objected to under 37 CFR 1.83(a) because they fail to show text labeling of the 4 rectangular boxes connected in series with S2-S5 (Drawing 5) as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Art Unit: 2636

Page 3

Specification

2. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or

REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)

- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (I) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Art Unit: 2636

Claim Objections

- 3. <u>Claims 1-3</u> are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim.

 Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Examiner is unsure of the dependency of claims 1-3. Examiner will treat claims 1-3 as independent, unless specified otherwise by Applicant.
- 4. No preamble for claims 1-3.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 recites the limitation "the system" in line 1.

Claim 1 recites the limitation "the transmitter" in lines 2 and 3.

Claim 1 recites the limitation "the parametric border" in line 3.

Claim 1 recites the limitation "the wireless transmitters" in line 5.

Claim 2 recites the limitation "the system" in line 1.

Claim 2 recites the limitation "the transmitter" in line 2.

Claim 2 recites the limitation "the characteristic" in line 3.

Claim 2 recites the limitation "the cordless transmitters" in line 3.

Claim 2 recites the limitation "the power supply" in line 5.

Art Unit: 2636

Claim 2 recites the limitation "the same transmitter batteries" in line 5.

Claim 3 recites the limitation "the system" in line 1.

Claim 3 recites the limitation "the transmitter" in lines 2-4.

Claim 3 recites the limitation "the characteristic" in line 3.

Claim 3 recites the limitation "the parametric border" in line 3.

Claim 3 recites the limitation "the electric circuit" in line 5.

Claim 3 recites the limitation "light emitting diode" in line 5.

- 6. There is insufficient antecedent basis for these limitations in the claims above.
- 7. <u>Claims 1-3</u> are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase "can be" is not definite language. Suggestion: Change "can be" to "is".

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 9. <u>Claims 1-3</u> are rejected under 35 U.S.C. 102(e) as being anticipated by Hoffman (US 2005/0018413).

Art Unit: 2636

Page 6

For claim 1, Hoffman discloses a system of electric hand light or emergency light applied to a transmitter for remote controlled vehicle security alarm system, obtained by placing in a parametric border of the transmitter case or in any part of their case surface, a light emitting diode or a group of light emitting diodes, with the advantage that it, or they, can be incorporated to anyone of wireless transmitters, regardless of their brand name or their origin and without interfering with their original design and functions (paragraph 0001; parag 0002, lines 1-7; parag 0005; parag 0006, Ins 1-6; parag 0008, Ins 5-8; parag 0020, Ins 4-6; parag 0024, Ins 1-6; Figure 2, items 41-44).

For claim 2, Hoffman discloses a system of electric hand light or emergency light applied to a transmitter for remote controlled vehicle security alarms with a characteristic that it can be incorporated to any cordless transmitters, regardless of their brand name or their origin and without interfering with their original design and functions, since it gets the power from the same batteries (paragraph 0025; Figure 2, items 41-44; parag 0046, Ins 6-13; parag 0047; parag 0049, Ins 7-10).

For claim 3, Hoffman discloses a system of electric hand light or emergency light function applied to a transmitter for remote controlled vehicle security alarms with a characteristic that it can be placed, in a parametric border of the transmitter case or in any part of their case surface, an electric switch specifically dedicated to close the electric circuit of the light emitting diode or a group of them or by means of a switch with combined functions (paragraph 0035, Ins 7-10; parag 0036, Ins 1-4).

Art Unit: 2636

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Rudenberg (US 6,443,604) discloses a transmitter for activating a lamp within the vehicle.

Hussey et al. (US 6,130,622) discloses a portable hand-held transceiver that produces illuminated alphanumeric pushbuttons when pushbuttons are activated.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jennifer A Stone whose telephone number is (571) 272.2976. The examiner can normally be reached on M-F from 8:00am to 4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jeffrey Hofsass, can be reached at (571) 272.2981. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
